

DATA PROTECTION DECLARATION – TIMSS 2019 EARLY LEARNING SURVEY and PUPIL QUESTIONNAIRE

Identity and contact details of controllers:

Educational Research Centre
DCU St Patrick's Campus
Drumcondra
Dublin 9
Ireland
Telephone: +353 1 837 3789
Email: timss.ireland@erc.ie
and

IEA
Keizersgracht 311
1016 EE Amsterdam
The Netherlands
Telephone: +31 20 625 3625
Email: secretariat@iea.nl

For which purpose are data collected and processed?

The data collected during the Trends in International Mathematics and Science Study (TIMSS 2019) will be used exclusively for scientific purposes. TIMSS is an educational research project sponsored by the International Association for the Evaluation of Educational Achievement (IEA). The Educational Research Centre (ERC) is administering TIMSS in Ireland at the request of, and on behalf of, the Department of Education and Skills. This is in accordance with one of the functions (“carrying out national and international assessments of the attainment levels and academic achievement of students and reporting on such assessments to the Minister”) set out in the ERC’s Establishment Order as a statutory body (which can be viewed in full at: <http://www.irishstatutebook.ie/eli/2015/si/392/made/en/print>). The ERC’s legal basis for processing personal data as per GDPR (Article 6) is “the performance of a task carried out in the public interest or in the exercise of official authority vested in the controller”.

Which information is requested?

The parents or legal guardians of fourth grade students in the participating schools are invited to complete the TIMSS 2019 Early Learning Survey in order to provide the study with information about early learning activities at home, occupation of the parents/guardians, country of birth of parents/guardians, educational background of the parents/guardians, home resources, and opinions regarding the child’s school. The pupils in the participating schools are asked to complete the TIMSS 2019 Pupil Questionnaire in order to provide the study with information about pupils’ gender, age, country of birth, home resources, language(s) spoken at home, and opinions regarding the school environment and mathematics and science lessons.

- In order to ensure that TIMSS is based on scientifically selected samples of pupils and schools, schools are expected to co-operate with the administration of TIMSS in their school where requested to do so (DES Circular 0056; 2011).

- Students or parents will not be disadvantaged in any way by non-completion of the questionnaire, and respondents are permitted to skip individual questions or to discontinue answering the questions at any time.
- By filling in and returning a completed questionnaire, a study participant is consenting to the collection and processing of their data within the questionnaire.
- Withdrawal of consent to the processing of data without stating any reason can be made by any participant up to 4 weeks after the tests have been administered.
- Any participant who wants to remove or amend their information can contact the Educational Research Centre (at 01 837 3789 or timss.ireland@erc.ie). If an individual withdraws from the study no additional data will be collected for that individual. Some information on withdrawals and exclusions is retained to validate the sample and to inform future administrations (e.g., to see if girls are more likely to withdraw from participation in the study).
- Queries related to how personal information is protected can be directed to the ERC's Data Protection Officer (data-protection@erc.ie).

What kind of data are collected?

Data from answers to the questions from parents or legal guardians of students participating in TIMSS are collected and stored. This is in the form of numbers representing selections (for example, a multiple choice question, or yes/no selection).

This information cannot, in and of itself, be used to identify individual respondents by name, however a student ID is recorded to uniquely identify each student. The relationship between this ID and the student name, or national registration number is known to the school coordinator and (depending on your country's data protection policy) may be known to the national center conducting the study. It is not, however, shared with the IEA or any third parties.

Where, how and for how long are data from TIMSS stored?

TIMSS data are stored securely and cannot be accessed by any external persons or systems. Moreover, any IEA employees who access the data for processing have been suitably briefed on what constitutes an acceptable treatment of data and have signed a confidentiality agreement.

The data are stored as follows:

Response data are stored indefinitely so that they remain available for analyses. These responses eventually result in a database that allows researchers to compare education systems worldwide (see *Public accessibility* below).

Data are processed centrally at the IEA in Hamburg, Germany. All data arriving for data processing are submitted without names – only the student ID numbers.

With whom and how are data from TIMSS shared?

Response data are sent from national research centers to the IEA, via a secure FTP server, in a pseudonymous form, that is: processed in such a manner that the personal data can no longer be attributed to a specific data subject without the use of additional information (any such additional information being kept separately and subject to technical and organizational measures to ensure that the personal data are not attributed to an identified or identifiable natural person).

TIMSS is directed by the International Study Center (ISC) based at Boston College, USA, and most of the international data analyses occur there. Response data are required for the analysis but are sent to the ISC, via a secure FTP server, in a pseudonymous form. ISC employees who access the data for analyses have signed a confidentiality agreement. The transfer of the data to

the USA, as a third country, is safeguarded by appropriate and suitable measures like a specific Data Processing Agreement and European Standard Contractual Clauses.

The data are also shared back, again over secure FTP server, with the national research centers running TIMSS in your country.

Related data

Principals and teachers are also asked to complete a questionnaire. Information coming from these sources is linked to that from parents and pupils in the final international research database (IDB).

Public accessibility

The final international research database will be accessible to the public from the following sites:

<https://www.iea.nl/data> (Hamburg, Germany)

<https://timssandpirls.bc.edu/index.html> (Boston, USA)

All data in the database are pseudonymous, and cannot be linked to individuals.

Automated decision-making and profiling

No automated decision-making, including profiling, referred to in Article 22 GDPR is conducted.

Rights of Data Subjects

Data Subjects are entitled to the rights set out in Articles 15-20 GDPR.

Data Subjects have the right to lodge a complaint with a supervisory authority. The relevant authority in Ireland is:

Office of the Data Protection Commissioner

Canal House

Station Road

Portarlington

R32 AP23

Co. Laois
