

# Digital Learning Framework Longitudinal Survey - Phase 1: Primary Digital Learning Team 1

## Primary DLT Leader

The Educational Research Centre, Drumcondra, Dublin, has been asked by the Department of Education and Skills to evaluate the national implementation of the Digital Learning Framework (DLF). This questionnaire is part of that evaluation.

This questionnaire should be completed by the Digital Learning Team leader or School Principal.

The purpose of the questionnaire is to gather information about your school's experience with and implementation of the Digital Learning Framework. Your school is one of 150 primary schools selected to take part. Collectively, the 150 schools provide a varied and representative picture at primary level.

The questionnaire is intended to take no more than 30 minutes to complete.

Your responses are very important in helping us to understand the successes and challenges in implementing the Digital Learning Framework in a wide variety of school settings.

We will also be asking you to complete similar questionnaires in Autumn 2020 and 2021. Comparing responses over time will enable us to identify what aspects of the DLF are working well, what the challenges are, and how these vary across various school contexts.

The responses to this survey will be reported to the Department of Education and Skills with suggestions for improvements and your school will receive a copy of this report.

We greatly appreciate your participation in this survey. High response rates will allow for stronger policy development, as well as a deeper understanding of the needs and challenges across a wide variety of school communities.

This study is conducted in compliance with the GDPR framework. **No personal information**, such as IP address or person name, is collected in the course of the survey. The survey involves identifying your school by providing the roll number. The roll number will be matched with other school-level information that is in the public domain such as enrolment size and DEIS status for analysis purposes. The results of individual schools will **not** be published: only group-level aggregates will be reported on. As soon as the survey period is complete, i.e. within three months of the Autumn 2021 data collection, the roll numbers will be permanently deleted from the survey dataset.

To allow us to process the data in good time, we would be grateful if you could submit your responses by **November 29th 2019**.

If you have any questions about this evaluation please contact [dlf@erc.ie](mailto:dlf@erc.ie).

*Many thanks for your participation and the best of luck with your work on the DLF.*

**Digital technologies** refer to electronic tools, systems, and devices that generate, store, or process data. These include computers, tablets, software and applications, websites, social media, multimedia, online games, robotics, cloud computing, and mobile devices.

**Embedding** refers to moving beyond ICT integration, where digital technology is seamlessly used in all aspects of teaching, learning and assessment to enhance the learning experiences of all students.

**Thinking about the pattern of embedding of digital technologies in your school, please make an approximation as to the proportion of teachers which fit each of these descriptions:**

	No teachers	About 1 in 4 teachers or less	About a half of teachers	About 3 in 4 teachers	All or almost all teachers
