

DATA PROTECTION DECLARATION – PIRLS 2021 SCHOOL QUESTIONNAIRE

Identity and contact details of controllers:

Educational Research Centre
DCU St Patrick's Campus
Drumcondra Road Upper
Dublin 9
Ireland
Telephone: +353 1 837 3789
Email: pirls.ireland@erc.ie

and

IEA
Keizersgracht 311
1016 EE Amsterdam
The Netherlands
Telephone: +31 20 625 3625
Email: secretariat@iea.nl

For which purpose are data collected and processed?

The data collected during the Progress in International Reading Literacy Study (PIRLS 2021) will be used exclusively for scientific purposes. PIRLS is an educational research project sponsored by the International Association for the Evaluation of Educational Achievement (IEA). The Educational Research Centre (ERC) is administering PIRLS in Ireland at the request of, and on behalf of, the Department of Education. This is in accordance with one of the functions (“carrying out national and international assessments of the attainment levels and academic achievement of pupils and reporting on such assessments to the Minister”) set out in the ERC’s Establishment Order as a statutory body (which can be viewed in full at:<http://www.irishstatutebook.ie/eli/2015/si/392/made/en/print>). The ERC’s legal basis for processing personal data as per GDPR (Article 6) is “the performance of a task carried out in the public interest or in the exercise of official authority vested in the controller”.

Which information is requested?

The principals (if a principal is not available, other similarly qualified personnel) of participating schools are invited to complete the PIRLS 2021 School Questionnaire in order to provide the study with information about the characteristics and resources of the school, instructional time, principals’ experience and education, and with principals’ opinion data.

- In order to ensure that PIRLS is based on scientifically selected samples of pupils and schools, schools are expected to cooperate with the administration of PIRLS in their school where requested to do so (Department of Education Circular 0056/2011).
- Principals will not be disadvantaged in any way by non-completion of the questionnaire, and respondents are permitted to skip individual questions or to discontinue answering the questions at any time.

- By filling in and returning a completed questionnaire, a study participant is consenting to the collection and processing of their data within the questionnaire.
- Withdrawal of consent to the processing of data without stating any reason can be made by any participant up to 4 weeks after the tests have been administered.
- Any participant who wants to remove or amend their information can contact the Educational Research Centre (at pirls.ireland@erc.ie). If an individual withdraws from the study, no additional data will be collected from that individual. Some information on withdrawals and exclusions is retained to validate the sample and to inform future administrations (e.g., to see if males are more likely to withdraw from participation in the study).
- Queries related to how personal information is protected can be directed to the ERC's Data Protection Officer (data.protection@erc.ie).

What kind of data are collected?

Data from answers to the questions from every completed PIRLS School Questionnaire are collected and stored. This is in the form of numbers representing selections (for example, a multiple choice question), or values (for example, a figure for number of pupils in the target grade). If principals choose to complete the survey online rather than on paper, there is further logging information stored regarding the first and latest log-in time, the number of times a respondent has logged in in total, the number of the current question, and whether or not the questionnaire has been submitted.

This information cannot, in and of itself, be used to identify individual respondents by name, however an ID is recorded to uniquely identify each school. The relationship between this ID and the school name and roll number, is known to the school coordinator and the ERC, but is not shared with any other third parties.

Where, how and for how long are data from PIRLS stored?

PIRLS data are stored securely in a pseudonymous form, that is: processed in such a manner that the personal data can no longer be attributed to a specific data subject without the use of additional information (any such additional information being kept separately and subject to technical and organisational measures to ensure that the personal data are not attributed to an identified or identifiable natural person). These data cannot be accessed by any external persons or systems. Moreover, any ERC or IEA employees who access the data for processing have been suitably briefed on what constitutes an acceptable treatment of data and have signed a confidentiality agreement.

The data are stored as follows:

Response data are stored indefinitely so that they remain available for analyses. These responses eventually result in a database that allows researchers to compare education systems worldwide (see Public accessibility below).

At the ERC, the data are stored as follows:

Data linked to individual pupils are stored until the international database is released (expected to be December 2022 for this cycle of PIRLS). At that point (or earlier in the cycle where possible), all data are anonymised so that there is no possibility of an individual study participant being identifiable.

At the IEA, the data are stored as follows:

Participant names are never sent to the IEA. Response data are stored indefinitely (without names) so that they remain available for analyses. These responses eventually result in a database that allows researchers to compare education systems worldwide (see Public accessibility below).

Response data from paper questionnaires are processed centrally at the IEA in Hamburg, Germany. Response data from online questionnaires are stored initially on web servers provided by Hetzner Online GmbH in Germany, (an ISO-27001 certified company), and then processed centrally at the IEA in Hamburg, Germany. All data are submitted without names – only the school ID numbers.

With whom and how are data from PIRLS shared?

As part of initial processing, the ERC shares some data from PIRLS with its subcontractors (e.g. for data entry). All subcontractors have signed a Data Processing Agreement and confidentiality agreement with the ERC.

Response data are then sent from national research centres to the IEA, via a secure FTP server, in a pseudonymous form, that is: processed in such a manner that the personal data can no longer be attributed to a specific data subject without the use of additional information (any such additional information being kept separately by the ERC and subject to technical and organisational measures to ensure that the personal data are not attributed to an identified or identifiable natural person).

PIRLS is directed by the International Study Center (ISC) based at Boston College, USA, and most of the data analyses occur there. Response data are required for the analysis but are sent to the ISC, via a secure FTP server, in a pseudonymous form. ISC employees who access the data for analyses have signed a confidentiality agreement. The transfer of the data to the USA, as a third country, relies on European Standard Contractual Clauses and is safeguarded by appropriate and suitable technical and organisational measures like a specific Data Processing Agreement.

The data are also shared back, again over secure FTP server, with the ERC.

Related data

Along with the principals, teachers and pupils are also asked to complete a questionnaire. Pupils' parents or legal guardians are also asked to complete an Early Learning Survey. Information coming from these sources is linked to that from principals in the final international research database (IDB).

Public accessibility

The final international research database will be accessible to the public from the following sites:
<https://www.iea.nl/data> (Hamburg, Germany)
<https://timssandpirls.bc.edu/index.html> (Boston, USA)

All data from Ireland in the database are anonymous, and cannot be linked to individuals.

Automated decision-making and profiling

No automated decision-making, including profiling, referred to in Article 22 GDPR is conducted.

Rights of Data Subjects

Data Subjects are entitled to the rights set out in Articles 15-20 GDPR.

Data Subjects have the right to lodge a complaint with a supervisory authority. The relevant authority in Ireland is:

Data Protection Commission
21 Fitzwilliam Square South
Dublin 2
D02 RD28
